## Ceramics ITP Meeting at Nagoya Institute of Technology

Introduction of the overseas partner institutes, and their research programs

Date : 13:00 – 16:00 , Wednesday, December 16 ,

Venue : Nagoya Institute of Technology Building 2, 3F, Classroom WY

Presenters: Professors from the overseas partner institutes

Program:

13:00-13:10 Opening

13:10-13:40 “Thermal Properties of Ceramics: influence of microstructural factors and application to thermal insulation” David. S. Smith (ENSCI)

13:40-14:10 “Rapid Prototyping by Ink Jet Printing as a Key Technology for the Shaping and functionalization of Highly Selective and Sensitive Ceramic-Based Sensors”  
Fabrice Rossignol (ENSCI)

14:10-14:30 Coffee break

14:30-15:00 “Bioactive hybrid scaffolds for bone regeneration“  
Julian R. Jones (Imperial College London)

15:00-15:20 “Ceramics Research at the Department of Materials Science of the University of Erlangen-Nürnberg” Peter Greil (University of Erlangen- Nürnberg)

15:20-15:50 “Progress in the Development of Nanostructured, Multifunctional Bioactive Scaffolds for Bone Tissue Engineering” Aldo R. Boccaccini (University of Erlangen- Nürnberg)

15:50-16:00 Closing

For inquires: Institute of Ceramics Research and Education,  
Nagoya Institute of Technology, Prof. Masayuki Nogami  
(Tel : 052-735-5285 email : [nogami@nitech.ac.jp](mailto:nogami@nitech.ac.jp) )

Attendance Free: Free
